R5.6 Payoff in the Average.

R5.6.1 Amount of Money and Number of Places. Determine amount of money to be used in the average. All averages are to pay the same amount of places as previous long go-rounds, regardless of the total amount of money in the average.

R5.6.2 Inclusion of Finals Results. When there is a finals, all markings and/or times will be included for purposes of determining the average.

R5.6.3 Contestant Must Compete in Every Go-Round. A contestant must compete in every go-round to qualify for the average. However, in the case that every contestant in a particular event has turned out at least once, the average money will be equally divided among those contestants who competed the most number of times, with this money not counting as Championship Points, but as ground money.

R5.6.4 Determination of Average Placings. Average placings shall be determined by the highest total score (riding events) or the fastest total time (timed events) for those who received a score or a time, as the case may be, on livestock drawn for each go-round. When enough contestants do not receive a score or time, as the case may be, on all stock drawn for them equal to the number of places to be paid, revert to those contestants not already placing in the average who have competed in every go-round and who have the highest total score, or the fastest total time, on one less head of livestock than the number of go-rounds. This process shall be repeated until the number of contestants eligible for the payoff equals the number of average placings. If a contestant competes in all go-rounds but fails to receive a score or time, as the case may be, in one go-round, he shall not be eligible for the payoff in the average, unless no contestant has received a score or time, in which case the money shall be divided among all contestants who competed on all stock drawn for them. This money shall not count for Championship Points, but instead will be ground money.

R5.6.5 Procedure When Too Few Contestants Compete. When fewer contestants have competed in each go-round, or fewer contestants have qualified on at least one head of stock, than the number of placings in the
